Well No. 2-A is located 1380 ft. from NEK line and 660 ft. from W line of sec. 13

NW/4SW/4 of 13 17S 30E NMPM
(4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Grayburg Jackson Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3713 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Permission is requested to deepen the above well, Stevens 2-A, from the present total depth of 3,479 to 3,800. This well has been producing in Zone 10 and is being deepened in an effort to find production in Zone 11, in which some production has recently been discovered in Section 22-17-29 about eight miles to the northwest. If no production is found in Zone 11, the well will be plugged back to its present total depth of 3,479.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
