13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This Unit water injection well failed the most recent NMOCD mechanical integrity test, We now propose to determine the source of the failure as follows: Dig 40' X 40' working pit, pull tubing, run packer to determine leak(s) and repair any leaks. Notify NMOCD for mechanical integrity re-test and return this well to active unit injection status.

We now propose to attempt to convert this unit water injection well to a producing unit oil well in the Lovington & Vacuum intervals of the San Andres formation (3045'-3230') instead of returning this well to an active injection status. The original BLM approved 3160-5 was signed by Mr. Adam Salamah and dated 05/03/96. Please note that work has been started on the approved work for this well so your very prompt review would be appreciated.
