13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

It is the intention of the operator to comply with your specifications and test the casing on the subject well. We do not wish to plug and abandon. It may be necessary to (1) restore the well to production (2) test behind casing oil zones or (3) switch the axis on the present water injection pattern to recover additional reserves. For these reasons we ask for approval to temporarily abandon the well subject to satisfactory casing test. We will notify the BLM at 887-6544 in time for a witness to be present during the test.

14. I hereby certify that the foregoing is true and correct
