The status of a bond for this well in conformance with Rule 39 of the General Rules and Regulations of the Commission is as follows: Pending

We propose to use the following strings of casing and to land or cement them as indicated:

Size of Hole	Size of Casing	Weight Per Foot	New or Second Hand	Depth	Landed or Cemented	Sacks Cement
<u>12 1/4"</u>	<u>10"</u>	<u>40#</u>	<u>2nd hand</u>	<u>500</u>	<u>Landed</u>	<u>Mud</u>

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil and gas sand should occur at a depth of about 1600 feet.

Additional information: We want to set around 1500', 32#, 8 1/2" and cement and mud to surface. Then pull 10" and have hole in shape to braden-head gas if we want to.

Approved January 23, 19 36

except as follows: If the Braden-head gas program is followed enough cement must be used, in setting the 6 5/8" casing, to bring the cement up to the base of the gas pay.
