(County or Subdivision)

New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Confirming telephone conversation J. L. Briscoe to John A. Frost, Nov. 15, 1955. We will drill a well on the above described location setting 10" pipe on top of the salt, using 50 sacks cement and heavy mud top to bottom, by Denton O.W.C.Co. We will set and cement a 100 ft. 8 5/8" liner through the red sand section, then set approximately 3,000' of 7" or 5 1/2" new casing for oil string, (after pay has been tested) using 50 sacks cement behind oil string, by Denton O.W.C.Co.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
