Casing leak survey

Signature Proposed or Completed: Positions of Wells to be Surveyed
SEE RULE 1103.

The above well was drilled in 1935, and the Bradenhead between the 10 3/4" casing and the 2" casing has a bull plug welded in on one side and a 3x3" swedge welded in on the other side. The threads on the swedge have been corroded off in this 5' cement lined cellar. Oil and Gas fences are in cellar.

Propose to insert a 1" nipple in the swedge, with an L, nipple and valve at surface.

This well will then be ready for scheduled survey.
