New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is 3644 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

A plug of 25 sacks of cement was placed at 7400' inside the 5 1/2" casing. The casing was pulled at 4560' and a 25 sack plug placed in the top of the 5 1/2" left in the hole.

The well was turned to General American Oil Company of Texas as operator, as per our telephone conversation of December 18, 1956. General American will send in a letter assuming responsibility.

The above work was completed as follows:

Plug set December 20, 1956; 5 1/2" recovered December 28, 1956.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Great Western Drilling Company
