Re: Gas Commingling
McIntyre Lease

Gentlemen:

Reference is made to your request for administrative approval for the commingling of casinghead gas produced from the Loco Hills-Abo Pool by your McIntyre A Well No. 4 with gas produced from the Fren formation by your McIntyre A Well No. 2, allocating the total metered stream to each well on the basis of periodic tests. These wells are located in Units I and P, respectively, of Section 20, Township 17 South, Range 30 East, Eddy County, New Mexico. It is our understanding that the ownership of the two wells is identical throughout.

You are hereby authorized to commingle the aforesaid gas production as proposed, provided that the combined stream shall be continuously metered, and provided further that the McIntyre Well No. 2 shall be tested semi-annually to determine its producing rate for the purpose of reporting production. Test results should be filed with the Artesia office of the Commission.

Very truly yours,

A. L. PORTER, Jr.
Secretary-Director
