

This report was submitted to USGS
in June 76 they did not approve
it till 1-11-77. in the meantime
Holly Energy Inc. purchased
all of FAT properties therefore
I don't know if this is still valid
or not. Will not see. Ocopy 2 SF

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

This well was completed February 24, 1940, producing gas from the Fren Sand open hole 1700 feet to 1819 TD. The gas production was not commercial, but was used for lease purposes. Production has since ceased. In the near future, we plan to move in a reverse unit and wash to bottom and spot a 75-sack plug in bottom of the hole and into the base of 7 inch casing, which was set at 1700 feet with 100 sacks cement. As this was a cable to hole, the cement outside the 7 inch casing is probably within 300 feet of surface inside the 8 5/8 inch casing, which is set at 541 feet with 50 sacks of cement. We therefore plan to fill the hole with heavy mud and place a 10-sack plug and marker at the surface.
