(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

- On a drill stem test of the Wolfcamp at 7670' - 7852', it was determined that there was a hole in the 8-5/8" casing. Pursuant to telephone conversation with Mr. Knauf, 7" casing was set at 2594 feet, and cemented with 380 sacks Class C cement which circulated to surface. The 7 inch casing was tested to 2000 PSI. Cementing work was done by Halliburton November 2, 1973.
