Report results of multiple completion on Well
(or other completion Report and Log form)

17. Describe briefly the nature of the work done on the well, including estimated date of starting any
project, and the results of the work done on the well, including estimated date of completion of the work done on the well.

This well was completed on September 14, 1973, producing from
the Pennsylvania formation at 11,234'-11,234'. We are presently negotiating
for a gas contract for the well. The negotiations have been delayed due to numerous changes
in FPC regulations and pipeline construction. We hope to get a contract executed
and pipeline completed within the next 30 days.
