The above well has been on water injection since May 1963. We wish to alter completion by installing a 5" liner from 2750', 40' inside the 7" casing to T.D. 3109'. This liner will be squeezed with cement and the pay zone perforated from approx. 3078 to 3104'. The well will be equipped with a 5" Tension Lacker on 2" tubing and returned to injection.
