13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This Grayburg pumping oil well recently encountered all water production. We have determined the water is from the lower most perf and the upper perf. Because of the increased water production rate and the fact this has very low pressure equipment, we propose to run a 7" CIBP and set above the upper most perforation(2873'.) The top of the 4-1/2" liner is approx 2872' so we are unable to use a 4-1/2" CIBP. We will dump 35 bbls of cement on top of the BP. We will then stop and do the proper filing to plug and abandon this well bore in the normal course of business.
