The first of these is the fact that the law is not a static entity, but a dynamic one, which is constantly evolving and changing. This is due to the fact that the law is a reflection of the society it governs, and as society changes, the law must also change. This is why the law is often referred to as a "living" law.

BRITISH TO COMRADE LAD NO JO

HISTORY OF OIL OR GAS WELL

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked", or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.
