Leas Hills Leas New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3562 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On June 1, 1962 we ran 2798' of 7" OD Std 23# JS used casing to 2800' and cemented 4/4 sacks Incon 4/6 gal and 100 sacks Incon 4/2 Gal. We pulled 10 3/4" casing and spotted 200 sacks Incon 4/6 gal at 423'. After standing 24 hours we pressured up on casing to 3200 psig. After 48 hours we drilled plug, bailed hole dry and re-run bailer. As shut-off proved complete drilling was resumed. Cementing was done by Denton Oil Well Cementing Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company General American Oil Company of Texas
