at 330'. This plug isolates top of salt and 8 5/8" casing shoe.

7. Perforated 4 squeeze holes at 50'. Tied onto casing and pumped 45 bbls salt gel mud before breaking circulation. Have some lost circulation between 8 5/8" and 7" casing. Pumped 110 sx Class C cement. Circulated 10 sx to pit. This serves as surface plug.
8. Dug out 7" and 8 5/8" casing to 6' and cut off. Set P&A marker and ready mixed with 4 yards cement. Cut off anchors and cleaned location. Surface plug was set on 7-28-94.
9. Will restore surface after receiving instruction from BLM.

Note: Plugging was witnessed by Don Early with BLM.
