The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Confirming telephone conversation between John A. Frost of United States Geological Survey in Artesia, New Mexico and J.L. Briscoe.

We shot this well with 100 qts of solidified glycerine, using shot gravel and oil for tamping, *by Independent Eastern Drilling Co.*

There was 400' of oil in the hole before the shot and the well swabbed 50 bbls. after the shot.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
