Leas Hills, New Mexico November 1, 1962

Well No. 6 is located 2310 ft. from N line and 330 ft. from E line of sec. 31

SESENE Section 31 17-S 30-E T.M.P.M.

($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Leas Hills Edy New Mexico

(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3987 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On February 21, 1962 we set cast iron bridge plug in 5 1/2" liner at 2900'. Damped 1 sack cement on plug. We perforated liner from 2859 to 2879' 1/4 jets/ft. We ran tubing with straddle packer and acidized with 250 gallons mud acid. After acid snubbed well dry. Well was tested periodically and showed no production until 9-23-62. On 9-23-62 pumped 24 BOPD. On 10-31-62 well was pumping 55 BO & 25 BOPD.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
