Loco Hills, New Mexico November 2, 1962Well No. 7 is located 900 ft. from N line and 330 ft. from E line of sec. 31Section 31 17-S 30-E N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)Loco Hills Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)The elevation of the derrick floor above sea level is 3985 ft.**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On February 21, 1962 we set cast iron bridge plug in 5 1/2" liner at 2960'. Dumped 1 sack cement on plug. We perforated liner from 2826 to 2846' w/4 jets/ft. We ran tubing with straddle packer and acidized with 500 gallons mud acid. After acid snubbed dry, well was tested periodically and showed no production until 8-1-62. Since this date well has produced approximately 1 BOPD.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
