The well was drilled to a depth of _____ feet and was completed at _____ feet. The casing was set at _____ feet and was cemented to _____ feet. The well was drilled by _____ and was completed by _____.

The well was drilled to a depth of _____ feet and was completed at _____ feet. The casing was set at _____ feet and was cemented to _____ feet. The well was drilled by _____ and was completed by _____.

The well was drilled to a depth of _____ feet and was completed at _____ feet. The casing was set at _____ feet and was cemented to _____ feet. The well was drilled by _____ and was completed by _____.

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of drilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "backtracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.
