

## Notice of Intention to Re-enter Old Plugged and abandoned Well and Shoot

IT IS PROPOSED TO RE-ENTER THIS WELL, CLEAN OUT AND SHOOT THE PREMIER SAND AS FOLLOWS:

CASING PROGRAM: In Order to properly shoot and test this well we propose to run new 7" OD 80% casing to shoulder at 3180'. Since a very light well at best is expected from shooting this sand it is proposed to mud casing to obtain a shut-off. If a proper shut-off cannot be obtained with mud, casing will be cemented with 20 sacks of cement.

SHOOTING PROGRAM: Will shoot with 320 quarts of solidified nitroglycerin from 3280'-3330'.

REMARKS: In the event that well is non-productive after shot, Notice of Intention to Replug and Abandon will be submitted at a later date.

CLEAN-OUT OPERATIONS TO COMMENCE ON OR ABOUT: July 23, 1952.
