DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

PRESENT TOTAL DEPTH: 3437'.
CASING RECORD: 10 3/4" at 517' with 50 sacks.

On October 15, 1952 this well plugged and abandoned.

We now propose to re-enter, drill out cement plugs, run approximately 3220' of 5 1/2" OD Casing and cement with 100 sacks.

After drilling out cement plug on 5 1/2" casing, we will clean out to approximately 3335' and stimulate well from 3220' to 3335' with a hydraulic fracture treatment.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
