13. Describe Proposed or Completed Operations (Clearly state all pertinent details, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This WIW is currently shut in. It is perforated 2954' to 3588' OA in the Grayburg-San Andres. Devon proposes to run cased hole logs, selectively perforate the interval 2812' to 3600' & acidize as needed. The well will then be returned to water injection. It is anticipated the proposed work will start 3-1-95.
