Artesia, New Mexico.
January 16, 1937.

Mr. F. J. Vesely
State Oil and Gas Inspector
Carlsbad, New Mexico.

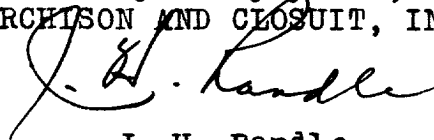

Dear Mr. Vesely:

Enclosed are the reports on the progress of our State A #1 well. It seems that probably the "Notice of Intention to Test Casing Shut-off" is not necessary now, but I have included it and rely on your judgement.

The notice for plan change is for a substitution of 6" casing for 6 5/8" casing, and we would appreciate an approval as soon as possible. Our well is 3300 feet deep at this writing so we will probably set our oil string of casing in the very near future.

I much regret the fact that I did not know of the various reports that were necessary, and assure that they will come in proper order and at the proper time in the future.

Very truly yours,
MURCHISON AND CLOSUIT, INC.

J. H. Randle
