OII Conservation Commission, Santa Fe, New Mexico.

Gentlemen:

Re: State Lease No. 803627

I have just recently deepened a well located SW SW, Section 19, Twonship 17S, Range 31 East, Eddy County New Mexico. This well was drilled down from the Seven Rivers to the Premier at about 3115<sup>t</sup>. A string of 5 1/2<sup>th</sup> pipe was run and cemented thru the Se en Rivers, I would like to have your permission at this time to produce this well into tanks which are now located on the lease and in which a small emount of Seven Rivers oil is produced, there is three Seven Rivers wells on the lease, however, the total production a day from the three is four or five barrels. Will most likely deepen another well on this lease starting in the next few days.

Wish to ask that you please mail copy of your letter granting the above request to Texas New Mexico Pipe Line Co as they are the transporters.

Thanking you for your prompt attention, I am,

Very truty yours, Denell O. H. Randel.
