Hobbs, New Mex. - June 7, 1947

Well No. 3 is located 1980 ft. from SW line and 1980 ft. from E line of sec. 23-

CMW/4 SE/4 Sec. 23- 17S 31E New Mexico
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Grayburg-Jackson Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ? ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill well No. 3 on the above described property, to be located as noted. Well to be drilled with cable tools and casing program is to be as follows:

SIZE HOLE	SIZE CASING	APPROX. CASING POINT	SACKS CEMENT
<u>11-1/4"</u>	<u>8-5/8"</u>	<u>625'</u>	<u>100</u>
<u>8-1/4"</u>	<u>7"</u>	<u>3250'</u>	<u>150</u>

The above casing points correspond with points picked for other wells in this area, and may vary a few feet due to elevation and geological tops encountered. Halliburton method will be used in cementing both strings of casing, with mud circulated ahead of cement. Cement shall be allowed to set in accordance with rules of the U. S. Geological Survey. Propose to drill well to the approximate total depth of 3835'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
