THE NATIONAL
COMMISSION ON
THE ENVIRONMENT
AND DEVELOPMENT

1. The Commission was
established in 1983

THE NATIONAL COMMISSION ON THE ENVIRONMENT AND DEVELOPMENT

The Commission was established in 1983 to advise the Government on environmental issues. It was the first of its kind in the world. The Commission's mandate was to ensure that environmental concerns were integrated into the country's development plans. It was composed of representatives from various sectors of society, including government, academia, and the private sector. The Commission's work was to be carried out through a series of studies, reports, and consultations with the public. The Commission's first report, 'The Environment and Development in the Philippines', was published in 1985. This report identified the major environmental problems facing the country and proposed a framework for addressing them. The Commission's work was to be carried out through a series of studies, reports, and consultations with the public. The Commission's first report, 'The Environment and Development in the Philippines', was published in 1985. This report identified the major environmental problems facing the country and proposed a framework for addressing them.
