Gentlemen:

Following is the Development Plan For Surface Use in association with the Application to Drill the Windfohr Oil Company Gissler B # 13 to be located 660' FWL and 660' FSL of Section 8, Township 17 South, Range 30 East, Eddy County New Mexico.

(1) Existing roads are shown by solid lines on the attached map, in the immediate proximity of the proposed location. This area is fairly well developed to the south and to the west, and the network of interconnecting location roads is extensive.

(2) Planned access roads will be limited to approximately 1320' of additional road as shown by the dashed line on the attached map. The road will be 10' wide with compacted caliche to a depth of six inches.

(3) Locations of existing wells are shown on the attached map.

(4) Lateral roads to well locations are covered by (1) and (2) above.

(5) The proposed location of a tank battery, in the event commercial quantities of oil are found, is shown on the attached plat.

(6) The location of the water to be used in the drilling of the well is a fresh water pipeline approximately one mile to the southeast of the proposed location. A temporary line will be laid to this source and taken up after well is drilled. Water will also be purchased at Loco Hills, New Mexico.

(7) The method for handling all waste disposal will be a waste pit at the location, to be covered up after drilling is completed.

(8) Location of camps- none.

(9) Location of airstrips- none.

(10) The drilling rig layout will be as shown on the attached plat. The drilling pad will be compacted caliche.
