13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

(1) OUR SEARCH OF VARIOUS RECORDS FOUND ANOTHER WELL BORE WITH THE NAME OF STEVENS A #5. WE NOW PROPOSE TO CHANGE THE NAME ON THIS COMPLETION TO STEVENS A #6.

(2) 1/22-23/97 Laid temporary gas flowline from Stevens A tank battery to a temporary gas meter set near the GJSAU meter located @ Unit K, 13-17S-30E. This was done to conserve this natural resource since Conoco will require additional time to install a permanent hook up at the Stevens A battery.

(3) 2/05-06/97 Ran pump & rods and put well to pumping.

We now request approval to change the name of this well to the Stevens A #6 as a non-standard location completed in the Grayburg interval and to build a complete new tank battery on this location pad. No archaeological work has been done for this proposal since this has been an active existing location since August 1976. We do attest that Burnett Oil Co., Inc. is the operator of all contiguous leases around this area. Administrative approval for this non-standard location has been requested from the NMOC.

14. I hereby certify that the foregoing is true and correct
