SUBJECT: Jenkins "B" #5 and #6 special testing allowable

DATE: 2/21/77

FOLD ↑

MESSAGE

Attached are copies of Form C-104 on the above two wells requesting 300 barrel special testing allowable on each well in order to run oil produced and complete testing for potentials on each of these. As soon as this has cleared your office, we would appreciate your telephoning this clearance to the transporter, Texas-New Mexico Pipe Line Company and charging this call to our telephone here in Breckenridge - A/C 817/559-3355. I'm not real familiar with the Texas New Mexico offices, but if there should be one there in Artesia possibly a long distance call would not be necessary. The Midland, Texas phone for Texas-New Mexico is 915/682-2531.

Thank you,
