13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was satisfactorily pressure tested on 12/4/92 per BLM specifications. The test was witnessed by Don Early of your Carlsbad office. Approval for a 12 month period ending 1/1/95 to continue temporary abandonment of the well was granted by Joe G. Lara on 3/31/94.

The well has potential use in the shallower San Andres zone operated by SDX of Midland. SDX has expressed an interest in having the well during past conversations. Central Resources has attempted to make telephone contact with SDX during the 30 period given us to bring the well into compliance by certified letter received 7-5-95.

Please grant a 90 day extension to allow us time to contact SDX through the mail services. Should we be unable to contact SDX in the 90 day period beginning August 1, 1995 and ending November 1, 1995, Central Resources will work with your office to obtain and execute a satisfactory plugging procedure.

I have attached a copy of the 12/4/92 integrity test.
