17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Exception to No-Flare Rule 306 expires September 13, 1980 and we request permission to install a temporary gas sales line to an existing, unused meter run until permanent facilities are installed. The temporary gas sales line will consist of 2" plastic "Fast-Line" starting at Maddren "A" #4 and extending southwest for approximately 1100' and then running northwest for approximately 300' in the bar ditch of already existing road to Phillips Petroleum Company's unused meter run. This sales line is only temporary and will be one continuous line layed on top of the ground and will be picked up after permanent facilities are installed. The 1100' running southwest has already been inspected and approved for installation as a flowline. This has been approved by the Bureau of Land Management in Carlsbad.

18. I hereby certify that the foregoing is true and correct
