(Note: Report results of multiple completion on Well Completion or Recompletion Report & Log form)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

On 1/17/94, Fina began a workover on the Fed KL-17 #1 well with the intent of fracture stimulating the Morrow, and leaving the packer set above the Atoka, so that a future thru-tubing Atoka recompletion could be attempted. On the 18th it was discovered that Tenneco Oil Company (operator prior to 1988), had already recompleted to the Atoka in 1987. There was no reference to this 1987 workover in any of the files received by Fina from Tenneco. When this discovery was made, Shannon Shaw, of the Carlsbad BLM was notified. Fina aborted the workover and began to put the wellbore in the same condition it was in before.

Attached is a daily report of the aborted workover; a Guiberson diagram showing the current upper packer details; and, a wellbore diagram showing the current status as we now believe to be correct.

14. I hereby certify that the foregoing is true and correct
