RE: Green "B" Federal No. 11
Section 7, T17S, R29E,
Eddy County, New Mexico

This is in response to Mewbourne Oil Company's request to review and clarify the formation name as to the interval from 10240' to 10246' in the Green "B" Federal No. 11 (Section 7, T17S, R29E, Eddy County, New Mexico). After reviewing the information submitted through Mewbourne Oil Company and the data available, the perforated interval from 10240' to 10246' by General American Oil Company of Texas in 1981, is properly identified as being a portion of the Atoka formation.

Signed:

Bryan Agram
Geologist
New Mexico Oil Conservation Division
Artesia, New Mexico
