C. If the proposed well is non-productive, all rehabilitation and/or vegetation requirements of the BLM and USGS will be complied with and will be accomplished as expeditiously as possible. All pits will be filled level within 90 days after abandonment.

11. OTHER INFORMATION:

- A. Topography: The land surface in the vicinity of the wellsite is in sand dunes. The immediate area of the wellsite is discussed above in paragraph 9B.
- B. Flora and Fauna: The vegetation cover consists of prairie grass, prairie flowers, reasewood and miscellaneous desert growth. No wildlife was observed but the wildlife in the area probably includes those typical of semi-arid desert land. The area is used for cattle grazing.
- C. There are no ponds, lakes, or rivers in the area.
- D. There are no inhabited dwellings in the vicinity of the proposed well.
- 3. Surface Comerchip: The wellsite is on federal surface.
- F. There is no evidence of any archeological, historical or cultural sites in the area.

12. GEORATOR'S REPRESENTATIVE:

A. The field representatives responsible for assuring compliance with the approved surface use plan are:

Ray Westell
P. 0. Box 4
Loco Hills, INT 88255
(505) 677-3113 - Office
677-3201 - Home

13. CERTIFICATION:

I hereby certify that I, or persons under my direct appervision, have inspected the proposed drillsite and access route, that I am familiar with the conditions which presently exist, that the statements made in this plan are to the best of my knowledge, true and correct; and, that the work associated with the operations proposed herein will be performed by Ray Westall and it's subcontractors in conformity with this plan and the terms and conditions under which it is approved.

Into 9-24-80

Ray Westall, Operator
