Re: Conoco State
#1-J-9-17-29
Und. Cave-G-SA Pool

Gentlemen:

The last report received by this office on the above captioned well was Division Form C-103 dated February 3, 1984. This form indicated that the well had been logged and 4½" casing was run to 2601' and cemented, and was perforated from 1934' to 1986', this work being done from December 3, 1983 to December 28, 1983.

Division Form C-103's were filed previously on January 5, 1984 stating that the well was fraced on December 30, 1983 and tested through January 11, 1984 and subsequently shut-in as of January 12, 1984.

Please file at your earliest convenience a C-103 indicating your intention as to the future disposition of this well. Also file 1 copy of all logs run on this well, along with Division Form C-105 and a notarized tabulation of the deviation survey as required by the Division's Rules and Regulations so that our records may be brought up to date.

Sincerely,

A handwritten signature in cursive script that reads "Leslie A. Clements".

Leslie A. Clements
Supervisor District II
