ALLEGED DECREASE

No well will be assigned an allowable greater than the amount of oil produced on the official test.
During and after test, each well shall be produced at a rate not exceeding two (2) times the amount of oil produced on the official test.
Operator is encouraged to file statement of this 25 percent tolerance in order that well can be assigned increased allowable when authorized by the Division.
Oil produced may be reported in MCF measured at a pressure base of 15.015 psia and a temperature of 60° F. Specific gravity base will be 0.87.
Each well must be in production of oil with production through well.
All wells of oil and gas must be reported to the division of the New Mexico Oil Conservation Division by the owner with data for the purpose of the report.

I hereby certify that the above information is true and complete to the best of my knowledge and belief.
