(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting and proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

NAME CHANGE The correct name should be ATALAYA FEDERAL #2.

It was drilled on the 240 acre lease NM-0558580. The Cedar Break Fed. name was a mistake,

FLOWLINE We would like to lay two (2) 2" Polyethylene (plastic) flowlines to handle the gas, oil & water between this well and an existing Atalaya tank battery located 1320' to the East of this wellsite.

The attached plat shows the linepipe to be laid immediately on the North shoulder of the new roadway. The lines are to be buired.

The attached archaeological clearance report (for the road) states that NMAS 5251 site located 110' south of road should be avoided. We wish to lay our flowlines immediately to the north of the road.

R.O.W total width = 75' (including road + ditch + power lines)*
* therefore, may need to re-survey powerlines

18. I hereby certify that the foregoing is true and correct
