EDDY COUNTY, NEW MEXICO

(DEVELOPMENT WELL)

This plan is submitted with the application for permit to drill the above described well. The purpose of the plan is to describe the location of the proposed development well, the proposed construction activities and operations plan, the magnitude of surface disturbance involved, and the procedures to be followed in rehabilitating the surface after completion of the operation so that a complete appraisal can be made of the environmental affects associated with the operation.

LOCATED: Approximate 20 air miles east of Artesia,

New Mexico.

FEDERAL LEASE NUMBER: LC-028758 (A)

LEASE ISSUED: January 26, 1951

RECORD LESSEE: Davoil Inc. and Great Western Drilling

OPERATOR'S AUTHORITY: Operating rights owned by Marbob Energy

Corporation.

BOND COVERAGE: Lessees \$150,000 nation-wide bond.

ACRES IN LEASE: 40 acres

SURFACE OWNERSHIP: U.S. Government with a grazing permit

issued to Bogle Farms, Inc., P.O. Box 358,

Dexter, New Mexico 88230.

POOL: Square Lake, San Andres

(40-acre spacing)

EXHIBITS: A. Portion of Eddy County Map

B. Oil & Gas Map

C. Road Map & Wells in vicinity of

Proposed Drillsite

D. Sketch of Well Pad

E. Sketch of BOP

THIRTEEN POINT PROGRAM

- 1. EXISTING ROADS: From Artesia go approximately 20 miles east on Federal Highway US-82 4/10 of a mile beyond Mile Post 129. (This point is approximately 3.1 miles west of Loco Hills, New Mexico). From this starting point turn left (North) on County Road 215 and proceed in a northerly direction for a distance of 1.4 miles. Next turn right and proceed east for a distance of .05 miles. Then turn left and proceed in a northerly direction for a distance of .2 miles. (At this point complete directions ie: "At this point the proposed new road begins. Turn right and proceed in an easterly direction (approximately 200 feet) to drillsite.
- 2. PROPOSED NEW ROAD: The new road will run from the existing road east to the drillsite, a distance of approxiamtely 200 feet.
- 3. LOCATION OF EXISTING WELLS: The nearest production to the proposed well is the Square Lake Federal No. 116 well located north of the proposed well. This well and all existing wells in the vicinity of the proposed drillsite are shown on Exhibits "B" and "C".

4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES:

- A. A tank battery will be built on the well pad located in SW/4SW/4, Sec. 12, T-17S, R-29E.
- B. There are powerlines on the lease, the closest pole being located approximately 400 feet northwest of the well location. The proposed electric powerline would be approximately 300 feet in length and run from the above referenced pole to a pole in the northwest corner of the well pad, which will have to be inserted. See Exhibit "E".
- 5. WATER SUPPLY: It is not planned to drill a water supply well. Water for leasehold operations will be purchased from a commercial water hauler.
- 6. CONSTRUCTION MATERIALS: Material for construction of the proposed new road and well pad will be obtained from either an existing approved caliche pit located on federal land in the SE/4 NE/4 of Section 14-17S-29E, or from the reserve pit.

7. WASTE DISPOSAL:

1

- A. Drill cuttings will be disposed of in the drilling pits.
- B. Drilling fluids will be allowed to evaporate in the drilling pits until the pits are dry.

- C. Water produced during tests will be disposed of in the pits.
- D. Oil produced during tests will be produced into temporary test tanks.
- E. Trash, water paper, garbage, and junk will be buried in a trash pit and covered with a minimum of 24 inches of dirt. All waste material will be contained to prevent scattering by the wind. Location of the trash pit is shown on Exhibit "D".
- F. All trash and debris will be buried or removed from the wellsite within 45 days after finishing each drilling and/or completion operation.
- 8. ANCILLARY FACILITIES: None anticipated.
- 9. WELLSITE LAYOUT: Refer to Exhibit "D" for direction orientation and access.
 - A. The wellsite has been surveyed and an area has been staked and flagged.
 - B. The dimensions and relative location of the drill pad and pit with respect to the well bore are shown on Exhibit "D".
 - C. The location is nearly level but contains several small sand dunes which will need to be leveled.
 - D. The well pad will be surfaced with caliche.

10. RESTORATION OF SURFACE:

- A. After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the wellsite in as aesthetically pleasing a condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. After abandonment, all equipment, trash and junk will be removed and the location cleaned. Any special rehabilitation and/or special revegetation requirements of the BLM will be complied with and accomplished as expeditiously as possible.

11. OTHER INFORMATION:

- A. Topography: The undisturbed wellsite is at an elevation of 3635.3 feet. The terrain of the area surrounding the location is relatively flat. Regional slope is to the southwest toward the Pecos River.
- B. Soil: Top soil at the wellsite is silty loam.
- C. Land Use & Type: The vicinity surrounding the drillsite is semiarid rangeland and its primary use is for production of oil and gas.
- D. <u>Flora:</u> Flora in the vicinity surrounding the drillsite is sparse. It consists primarily of javalina, saltbush, broomweed and mesquite.
- E. Fauna: No wildlife was observed, however fauna for this type of habitat normally consists of lizards, snakes, rabbits, rodents, coyotes, skunks, quail, dove, and other small birds.
- F. Ponds & Streams: None.
- G. Water Wells: The nearest known water well is over 1 mile to the west.
- H. Residences & Other Structures: There are no occupied dwellings within one (1) mile of the proposed drillsite.
- I. Archaeological, Historical & Cultural Sites: An archaeology consultant and a formal report has been or will be furnished directly to BLM upon its completion.
- 12. OPERATOR'S REPRESENTATIVE: Representatives responsible for assuring compliance with the approved Surface Use Plan:

Mack Chase or John R. Gray P. O. Drawer 217 Artesia, New Mexico 88210 Phone 505-748-3303

13. CERTIFICATION:

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drillsite and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are, to the best of my knowledge true and correct; and, that the work associated with the operations proposed herein will be performed by MARBOB ENERGY CORPORATION and its sub-contractors in conformity with this plan and the terms and conditions under which it is approved.
