If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

THE CASING PROGRAM FOR THE SUBJECT WELL WAS CHANGED TO RUN AN ADDITIONAL STRING OF CASING AS SHOWN BELOW:

PROPOSED CASING AND CEMENTING PROGRAM

SIZE OF HOLE	GRADE, SIZE OF CASING	WEIGHT PER FOOT	SETTING DEPTH	QUANTITY OF CEMENT
17 1/2"	13 3/8"	#48	350'	500sx Class C (Circulate)
12 1/4"	8 5/8"	#24	1400'	600sx Class C (Circulate)
7 7/8"	5 1/2"	#14	4900'	1200sx Class C (Circulate)

This notice is being sent to clear up any problems caused by the change in the casing program on this well. The application was originally submitted reflecting our intention to run two strings of pipe. After careful consideration of water flows that would be encountered, the decision was made to upgrade the casing design to include an additional string of casing. Due to a breakdown in communication and heavy work load, the sundry notice indicating this change was never sent to the BLM. This was not intentional. We always try to cooperate in following all Rules & Regulations set forth by the BLM & OCD. We will continually strive to accomplish this in the future.
