13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

In order to properly evaluate the prospective Fren interval from 1800'-2000' by coring and additional logging, we propose to amend our approved surface casing setting depth from $\pm 500'$, to approximately 1500'. This will insure that while evaluating the Fren interval we will have the hole protected from any shallow waterflows encountered. The surface pipe will be cemented to surface as in the original APD.

Verbal approval for this change of plans, pending submission of a Sundry Notice, was given by Mr. Adam Salameh on July 10, 1992.

14. I hereby certify that the foregoing is true and correct.
