13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Due to Central Valley Electric Co-Op requirements, it is proposed to revise the power line route as indicated on attached map. Dean Electric Company will install necessary poles and 7.2/12.47 KV line to furnish power for pumping.

The route will extend southwest from well No.24 and will be constructed within the previously-approved salt water injection line R-O-W. This R-O-W has been previously surveyed by Archaeological Survey Consultants of Roswell, New Mexico.
