13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

APD stipulations require the drainage ditch located 25' Southwest of the proposed well to be redirected around the location's West side. In order to take advantage of existing drainage, Devon proposes to redirect this drainage approximately 200' to the East through an existing canal (sketch attached).

RE: Turner "A" 49

This location was staked 31' East of an arroyo. The arroyo runs North and South crossing a lease road (road runs East and West) 150' North of the proposed well site. Diverting this arroyo to the East through an existing draw will stop the erosion running to the South. The diversion will be made 222' North East of the well site. A drawing of the well site is attached. This will also limit the water crossing the road once the natural drainage is in place to divert water 210' East of the well site.

Thank you.
