Re: Non - Standard Location Approval

Dear Sir:

It is requested that administrative approval be granted under Rule 104F. (1) for unorthodox location at the following location:

**WELL**

**LOCATION**

Turner B #115

1050' FNL & 25' FWL, Sec. 20-17S-31E

Forms 3160 - 3 and C - 102 are attached for the well listed above.

The above location does not conform to Rule 104. C. I. because it is located closer than 330' to the governmental quarter - quarter section boundary. It will be drilled to a depth sufficient to produce the Grayburg - San Andres formation (approximately 4000'). The well will be drilled at the unorthodox location in order to prevent waste by developing an efficient production injection pattern within the Russell - Turner Waterflood Project, which was approved under Order R - 3185 and to avoid an archaeological site. When fully developed this well will combine with the existing wells (some of which will eventually be converted to injection) to establish a 40 acre 5 spot waterflood pattern.

Since we are the operator of the offsetting 40 acre tracts, no notice is necessary. Interest owners that have production in offsetting 40 acre tracts were notified by certified mail. Copies of this notification to each interest owner along with the certified mail number is attached. Copies of the return receipts will be forwarded to you when they are received.

Should you require any additional information regarding this unorthodox location, please notify me at 405-552-4527.

Sincerely,

*Karen Byers*
