13 Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work)*

Mack Energy Corporation has changed its plan to drill a vertical well to a directional drilled well. MEC proposes to drill from the unorthodox location (2600 FSL & 760 FWL) , set intermediate casing at 1040, drill down to a depth of 1500' and run a Gyro, then kickoff and drill to an orthodox location (2290 FSL & 990 FWL). Attached is a copy of the ammended APD, plat, and the Planning Report.
