13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Yates Drilling Company respectfully requests permission to make the following changes to this well:

Will nipple up 5,000 psi BOP on 11 3/4" casing as required by BLM stips, however we will test the BOPE and casing to 1,400 psi (70% 11 3/4" casing burst) as allowed by Onshore Order #2, not to 5,000 psi as required in stips.

Also, we would like to change the 8 5/8" setting depth to 2,900' and the design of the string. The string will now be all 32# J-55 w/ ST&C couplings instead of a mixture of 24 & 32# J-55.

Sincerely,

Gary Gouster, RFO
