Dear Mr. Tower:

Your company has .022406 oil and .0510086 gas ORRI from Burnett Oil's interest only in the referenced well. All other Working, Royalty and Overriding interest in these zones is the same. We would like to use the existing Gissler B 3-3 lease tank battery as the most efficient and economic use of equipment at the present time.

We request your approval to "Off Lease Surface Commingle" the Cedar Lake Yeso zone production from the referenced well with the present Grayburg production from the Gissler B #15,20,24, & #25 wells in the Gissler B 3-3 Tank Battery (State POD #0649410...30 & ...50.) All production in this battery is presently being allocated based on periodic individual well test. The test method is with a 1996 Natco built trailer mounted Huskie Jr. Port-A-Chek well tester.

Please sign one copy of this Waiver of Objection to Surface Commingle the Cedar Lake, Yeso with the Square Lake and Grayburg production in the existing Gissler B 3-3 Battery (Unit M, Sec 11, T17S, R30E, Eddy County, New Mexico) and return to us.
