

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	X	REPORT ON DEEPENING WELL

Name

Title

On July 8, pulled 6 5/8 " 8 $\frac{3}{4}$ " and 10" casing. Cemented 1085' of 5 3/16" casing, with 100 sacks cement, using International Cementers method. Let stand for 72 hours for cement to set.

On July 11, drilled out cement and plug, and as test showed water was not shut-off, plugged hole at 1085' and recemented. Let stand 72 hours, for cement to set.

On July 15, drilled out cement and plug and test showed water was not shut off. Drilled ahead to 1675'.

On August 28, bridged hole at 1102 feet and cemented 5 3/16" casing. Let stand for 72 hours for cement to set.

On September 3, after drilling out cement and plug, and test showing water not shut-off, recemented with 40 sacks of cement, and let stand 72 hours.

On September 9, after drilling out cement and plug, and having a hole full of water, ran seven sacks of Cal-Seal.

On September 11, after drilling out Cal-seal and testing, recemented with 25 sacks of cement.

On September 16, after drilling out cement and plug, and finding water not shut off, recemented again.

On September 20, drilled out cement and plug and tested, showing water not shut off.

These later cement jobs were done by Halliburton OilWell Cementing Co.
