State names of and expected depths to	o objective sands: show sizes	
	o objective sands; show sizes ing points, and all ot	, weights, and lengths of proposed casings; indicate mudding jobs, cement ner important proposed work)
Plan to clean out to el o a maximum depth o	o objective sands; show sizes ing points, and all ot detail depth (14 1800 feet. Shows	, weights, and lengths of proposed casings; indicate mudding jobs, coment- ner important proposed work) 137) foot, aqueene perforations, and drill puld sufficient oil show be encountered
Plan to class out to al o a maximum depth o n the upper Yeso for:	o objective sands; show sizes ing points, and all other depth (14 1800 feet. Showation, we would	, weights, and lengths of proposed casings; indicate mudding jobs, coment nor important proposed work) 137) foot, aqueese perforations, and drill puld sufficient oil show be encountered. A run 4-1/2" or 5-1/2" casing to the
Tan to close out to el o a maximum dopth o n the upper Yoso for:	o objective sands; show sizes ing points, and all other depth (14 1800 feet. Showation, we would	, weights, and lengths of proposed casings; indicate mudding jobs, coment nor important proposed work) 137) foot, aqueese perforations, and drill suid sufficient oil show be encountered. A run 4-1/2" or 5-1/2" casing to the
Plan to close out to el o a maximum depth o n the upper Yeso for:	o objective sands; show sizes ing points, and all other depth (14 1800 feet. Showation, we would	weights, and lengths of proposed casings; indicate mudding jobs, comentmer important proposed work) 137) feet, squeece perforations, and drill suid sufficient oil show be encountered of run 4-1/2" or 5-1/2" casing to the case.
Tan to close out to el o a maximum dopth o n the upper Yoso for:	o objective sands; show sizes ing points, and all other depth (14 1800 feet. Showation, we would	weights, and lengths of proposed casings; indicate mudding jobs, cement- ner important proposed work) 137) foot, squeeze perforgations, and drill puld sufficient oil show be encountered A run 4-1/2" or 5-1/2" casing to the oot.
Plan to class out to al o a maximum depth o n the upper Yeso for:	o objective sands; show sizes ing points, and all other depth (14 1800 feet. Showation, we would	weights, and lengths of proposed casings; indicate mudding jobs, comenter important proposed work) 137) foot, squeeze perforations, and drill suid sufficient oil show be encountered of run 4-1/2" or 5-1/2" casing to the each.
Plan to class out to al o a maximum depth o n the upper Yeso for:	o objective sands; show sizes ing points, and all other depth (14 1800 feet. Showation, we would	weights, and lengths of proposed casings; indicate mudding jobs, coment nor important proposed work) 137) foot, aqueeue perforations, and drill puld sufficient oil show be encountered. A run 4-1/2" or 5-1/2" casing to the cost.
Plan to clean out to el o a maximum depth o n the upper Yeas for new T.B., coment, p	o objective sands; show sizes ing points, and all other depth (14 1800 feet. Showation, we would extend to	weights, and lengths of proposed casings; indicate mudding jobs, coment nor important proposed work) 137) foot, aqueene perforations, and drill suid sufficient oil show be encountered. A run 4-1/2" or 5-1/2" casing to the oot.
Plan to clean out to all o a maximum depth on the upper Yeas former T.B., coment, p	o objective sands; show sizes ing points, and all other depth (14 1800 feet. Showation, we would extend to	weights, and lengths of proposed casings; indicate mudding jobs, comenter important proposed work) 137) foot, squeeze perforations, and drill suid sufficient oil show be encountered of run 4-1/2" or 5-1/2" casing to the each.
Plan to clean out to el o a maximum depth o n the upper Yeas for new T.B., coment, p	o objective sands; show sizes ing points, and all off id total depth (14 1800 feet. Showation, we would exforate, and track must receive approval in which must receive approval in which we have the contract of the contract	weights, and lengths of proposed casings; indicate mudding jobs, cement- ner important proposed work) 137) foot, aqueese perforgations, and drill puld sufficient oil show be encountered A run 4-1/2" or 5-1/2" casing to the oot.
Plan to clear out to all a maximum depth on the upper Year former T.B., coment, pure T.B., coment, pure Tunderstand that this plan of wor Company	ing points; show sizes ing points; and all of ing points; and all of ing points; and ing point	writing by the Geological Survey before operations may be commenced.
Plan to clear out to all a maximum depth on the upper Year form T.B., compant, proceedings of the Company T.B. Address	ing points, and all off ing points, and all off ing points, and all off ing points, and ing points, and its ing points, and its ing points, and its ing points in the ing points, and ing points in the ing points in the ing points, and all off ing points, and all off ing points, and all off ing points, and ing points, and all off ing points, and ing points ing points, and ing points ing points in the ing points in the ing points in the ing points ing points in the i	writing by the Geological Survey before operations may be commenced.
Plan to clear out to all a maximum depth on the upper Year form T.B., compant, proceedings of the Company T.B. Address	ing points; show sizes ing points; and all of ing points; and all of ing points; and ing point	weights, and lengths of proposed casings; indicate mudding jobs, cement- ner important proposed work) 137) foot, aqueese perforgations, and drill puld sufficient oil show be encountered A run 4-1/2" or 5-1/2" casing to the oot.
