

FORM C-102
DUPLICATE

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

RECEIVED
DEC 10 1940
HOBBS OFFICE

MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS	REPORT ON REPAIRING WELL
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL	REPORT ON PULLING OR OTHERWISE ALTERING CASING
REPORT ON RESULT OF TEST OF CASING SHUT-OFF X	REPORT ON DEEPENING WELL
REPORT ON RESULT OF PLUGGING OF WELL

The first of these is the fact that the system is not a simple one, but a complex one, involving many different factors. The second is that the system is not a static one, but a dynamic one, involving many different factors. The third is that the system is not a closed one, but an open one, involving many different factors. The fourth is that the system is not a linear one, but a non-linear one, involving many different factors. The fifth is that the system is not a deterministic one, but a probabilistic one, involving many different factors. The sixth is that the system is not a continuous one, but a discrete one, involving many different factors. The seventh is that the system is not a homogeneous one, but a heterogeneous one, involving many different factors. The eighth is that the system is not a uniform one, but a non-uniform one, involving many different factors. The ninth is that the system is not a constant one, but a variable one, involving many different factors. The tenth is that the system is not a fixed one, but a flexible one, involving many different factors. The eleventh is that the system is not a rigid one, but a pliable one, involving many different factors. The twelfth is that the system is not a solid one, but a liquid one, involving many different factors. The thirteenth is that the system is not a hard one, but a soft one, involving many different factors. The fourteenth is that the system is not a strong one, but a weak one, involving many different factors. The fifteenth is that the system is not a powerful one, but a feeble one, involving many different factors. The sixteenth is that the system is not a mighty one, but a lowly one, involving many different factors. The seventeenth is that the system is not a noble one, but a base one, involving many different factors. The eighteenth is that the system is not a virtuous one, but a vicious one, involving many different factors. The nineteenth is that the system is not a good one, but a bad one, involving many different factors. The twentieth is that the system is not a beautiful one, but a ugly one, involving many different factors. The twenty-first is that the system is not a pleasant one, but a unpleasant one, involving many different factors. The twenty-second is that the system is not a happy one, but a sad one, involving many different factors. The twenty-third is that the system is not a healthy one, but a unhealthy one, involving many different factors. The twenty-four is that the system is not a safe one, but a dangerous one, involving many different factors. The twenty-five is that the system is not a secure one, but a insecure one, involving many different factors. The twenty-six is that the system is not a sound one, but a unsound one, involving many different factors. The twenty-seven is that the system is not a wise one, but a unwise one, involving many different factors. The twenty-eight is that the system is not a just one, but a unjust one, involving many different factors. The twenty-nine is that the system is not a fair one, but a unfair one, involving many different factors. The thirty is that the system is not a reasonable one, but a unreasonable one, involving many different factors. The thirty-one is that the system is not a logical one, but a illogical one, involving many different factors. The thirty-two is that the system is not a rational one, but a irrational one, involving many different factors. The thirty-three is that the system is not a sensible one, but a unsensible one, involving many different factors. The thirty-four is that the system is not a practical one, but a impractical one, involving many different factors. The thirty-five is that the system is not a useful one, but a unuseful one, involving many different factors. The thirty-six is that the system is not a valuable one, but a valueless one, involving many different factors. The thirty-seven is that the system is not a precious one, but a cheap one, involving many different factors. The thirty-eight is that the system is not a rare one, but a common one, involving many different factors. The thirty-nine is that the system is not a unique one, but a ordinary one, involving many different factors. The forty is that the system is not a special one, but a general one, involving many different factors. The forty-one is that the system is not a particular one, but a universal one, involving many different factors. The forty-two is that the system is not a specific one, but a general one, involving many different factors. The forty-three is that the system is not a definite one, but a indefinite one, involving many different factors. The forty-four is that the system is not a certain one, but a uncertain one, involving many different factors. The forty-five is that the system is not a sure one, but a unsure one, involving many different factors. The forty-six is that the system is not a true one, but a false one, involving many different factors. The forty-seven is that the system is not a real one, but a unreal one, involving many different factors. The forty-eight is that the system is not a genuine one, but a fake one, involving many different factors. The forty-nine is that the system is not a authentic one, but a inauthentic one, involving many different factors. The fifty is that the system is not a original one, but a copied one, involving many different factors. The fifty-one is that the system is not a new one, but an old one, involving many different factors. The fifty-two is that the system is not a modern one, but an antique one, involving many different factors. The fifty-three is that the system is not a contemporary one, but a historical one, involving many different factors. The fifty-four is that the system is not a current one, but a past one, involving many different factors. The fifty-five is that the system is not a recent one, but an ancient one, involving many different factors. The fifty-six is that the system is not a new one, but an old one, involving many different factors. The fifty-seven is that the system is not a modern one, but an antique one, involving many different factors. The fifty-eight is that the system is not a contemporary one, but a historical one, involving many different factors. The fifty-nine is that the system is not a current one, but a past one, involving many different factors. The sixty is that the system is not a recent one, but an ancient one, involving many different factors. The sixty-one is that the system is not a new one, but an old one, involving many different factors. The sixty-two is that the system is not a modern one, but an antique one, involving many different factors. The sixty-three is that the system is not a contemporary one, but a historical one, involving many different factors. The sixty-four is that the system is not a current one, but a past one, involving many different factors. The sixty-five is that the system is not a recent one, but an ancient one, involving many different factors. The sixty-six is that the system is not a new one, but an old one, involving many different factors. The sixty-seven is that the system is not a modern one, but an antique one, involving many different factors. The sixty-eight is that the system is not a contemporary one, but a historical one, involving many different factors. The sixty-nine is that the system is not a current one, but a past one, involving many different factors. The seventy is that the system is not a recent one, but an ancient one, involving many different factors. The seventy-one is that the system is not a new one, but an old one, involving many different factors. The seventy-two is that the system is not a modern one, but an antique one, involving many different factors. The seventy-three is that the system is not a contemporary one, but a historical one, involving many different factors. The seventy-four is that the system is not a current one, but a past one, involving many different factors. The seventy-five is that the system is not a recent one, but an ancient one, involving many different factors. The seventy-six is that the system is not a new one, but an old one, involving many different factors. The seventy-seven is that the system is not a modern one, but an antique one, involving many different factors. The seventy-eight is that the system is not a contemporary one, but a historical one, involving many different factors. The seventy-nine is that the system is not a current one, but a past one, involving many different factors. The eighty is that the system is not a recent one, but an ancient one, involving many different factors. The eighty-one is that the system is not a new one, but an old one, involving many different factors. The eighty-two is that the system is not a modern one, but an antique one, involving many different factors. The eighty-three is that the system is not a contemporary one, but a historical one, involving many different factors. The eighty-four is that the system is not a current one, but a past one, involving many different factors. The eighty-five is that the system is not a recent one, but an ancient one, involving many different factors. The eighty-six is that the system is not a new one, but an old one, involving many different factors. The eighty-seven is that the system is not a modern one, but an antique one, involving many different factors. The eighty-eight is that the system is not a contemporary one, but a historical one, involving many different factors. The eighty-nine is that the system is not a current one, but a past one, involving many different factors. The ninety is that the system is not a recent one, but an ancient one, involving many different factors. The ninety-one is that the system is not a new one, but an old one, involving many different factors. The ninety-two is that the system is not a modern one, but an antique one, involving many different factors. The ninety-three is that the system is not a contemporary one, but a historical one, involving many different factors. The ninety-four is that the system is not a current one, but a past one, involving many different factors. The ninety-five is that the system is not a recent one, but an ancient one, involving many different factors. The ninety-six is that the system is not a new one, but an old one, involving many different factors. The ninety-seven is that the system is not a modern one, but an antique one, involving many different factors. The ninety-eight is that the system is not a contemporary one, but a historical one, involving many different factors. The ninety-nine is that the system is not a current one, but a past one, involving many different factors. The hundred is that the system is not a recent one, but an ancient one, involving many different factors.
